## OUTDOOR/INDOOR Theme Screens/mini

### Role Play backdrops

Following the great success of the Theme Screens, here by popular request is a smaller version for schools with limited space.

Backdrop banners using real photographs depict different scenes. These fit inside the hinged frames creating a scenic background, giving role play added realism and creating opportunities for topics and discussion. Alternatively, the banners alone can be mounted on an existing wall or in a corner. They are made from weather proof PVC and roll up in storage tubes when not in use.

The metal frames have detachable legs allowing them to be lowered to the floor, creating the ideal surround for small world play or for use with younger children. Use inside or out, in sheltered areas.

### 1) Theme Screen mini - frames

The two hinged frames lock together at right angles and the banners attach using elasticated toggles. Additional banners can be fitted to the reverse of each frame too. The frames fold together for storage and are easy to carry. Frame size, with legs : W 97 X 121cm, without legs : W 97 X 106cm Wgt : 12kg

Code : 550

Cost : £199.00

### 2) Theme Screen mini - foot pack

In order to use the frames in a straight line rather than at right angles or for additional stability, a foot pack is available. (Not needed for normal school use)

Code 550a

Cost : £43.99
